iGlass ALU DOVRATNIK "STANDARD" - drveno krilo

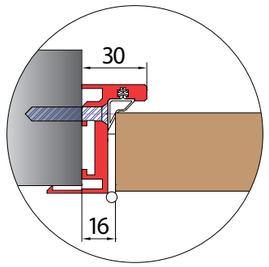

iGlass AD 5700

Aluminijski dovratnik minimalističkih dimenzija i jednostavnog dizajna lijepo će se uklopiti u svaki interijer. Zbog njegove prilagodljivosti moguće ga je kombinirati sa staklenim ili drvenim krilom, nadsvjetlom ili fiksnom staklenom stijenom.

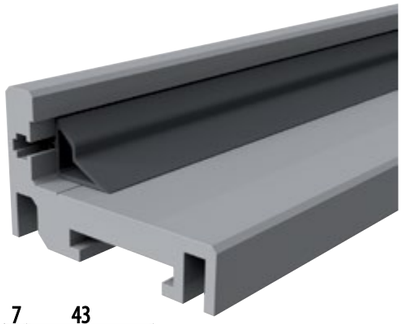

iGlass AD 5700 "Z"

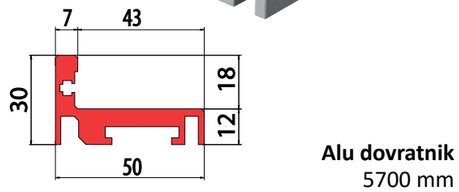

Kod montaže dovratnika na vanjski ili unutarnji rub zida preporučujemo "Z" tip dovratnika. Njime se mogu prekriti eventualni estetski nedostatci samog ruba pa nije potrebno dodatno obrađivati spoj zida i dovratnika.

iGlass ALU DOVRATNIK "STANDARD" - mogućnosti izvedbe

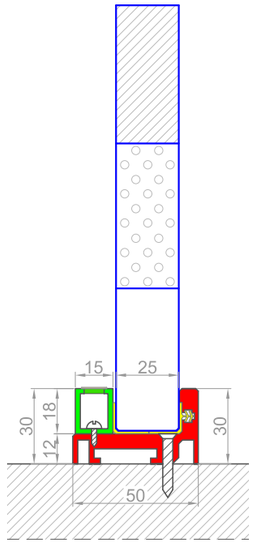

iGlass AD 5700 iGlass AD 5700 "Z"

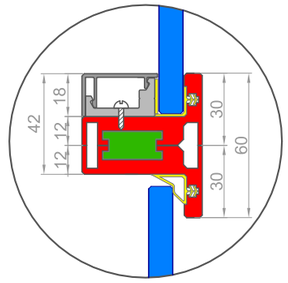

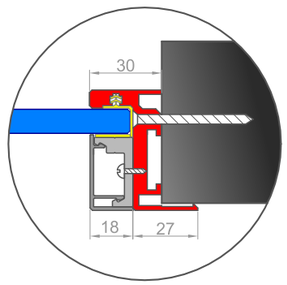

ISPUNA ŠIRINE 25 mm
(IZO staklo, MDF, iveral, aku. panel i slično)

1 | Kod izvedbe klasičnih vrata ili u varijanti s nadsvjetlom moguće je kombinirati dovratnik s dodatnim "U" profilom (podštokom). Ovakva izvedba osobito je značajna kod nepravilno, grubo izvedenih otvora. U tom slučaju lako i precizno reguliramo širinu otvora te na taj način postižemo pravilan položaj alu dovratnika.

2 | Mogućnost izvedbe nadsvjetla. Kod otvora većih visina moguće je jednostavno izraditi stakleno ili drveno vratno krilo s fiksnim nadsvjetlom u kombinaciji s klik bazom i maskom fiksera. Montaža je brza i jednostavna.

3 | Mogućnost izvedbe fiksne staklene stijene. Kod otvora većih dimenzija moguće je izraditi stakleno ili drveno vratno krilo s fiksnom stijenom u kombinaciji s klik bazom i maskom fiksera.

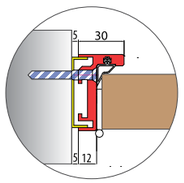

Sjenilo magnetno

IG SM

4 | Inteligentan i jednostavan sustav sjenila koji se lako i brzo montira na fiksne pregrade izvedene u iGlass AD 5700 sustavu.
Laganim pokretom ruke, sjenilo se razvlači ili skuplja te se namješta tako da prekriva cijelu, djelomičnu ili minimalnu površinu stakla ovisno o željenom propuštanju svjetla. Sjenila su dostupna u raznim bojama.

NAPOMENA: Profili su eloksirani i isporučuju se po komadu, u dužinama od 5700 mm.
Moguće eloksiranje ili plastifikacija u željenu boju te usluga rezanja na mjeru.

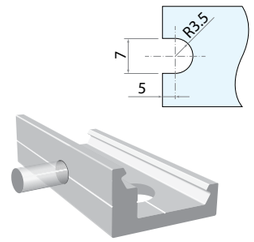

5

5

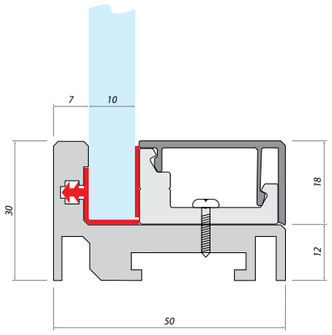

5

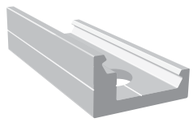

5 | Sustav koji zamjenjuje klasičnu staklodržačku kvadratnu lajsnu. Baza maske fiksera profila za IGAD 5700 omogućuje jednostavniju montažu, a maska fiksera, koja se jednostavno "klikne" na bazu pruža bolji izgled jer nema rupa za vijke.

Moguća je i montaža nadsvjetla bez donje prečke čime staklena vrata i stakleno nadsvjetlo postaju jedna estetska cjelina. Za izvedbu nadsvjetla bez donje prečke potrebno je naručiti baznu masku fiksera koja je opremljena sigurnosnim klinom.

- √ minimalistički dizajn
- √ za pregrade od različitih materijala
- √ za debljine zidova od 40 mm na dalje
- √ za staklena i drvena vrata
- √ fiksiranje i niveliranje na više načina (vijak, pur pjena, nosač ...)

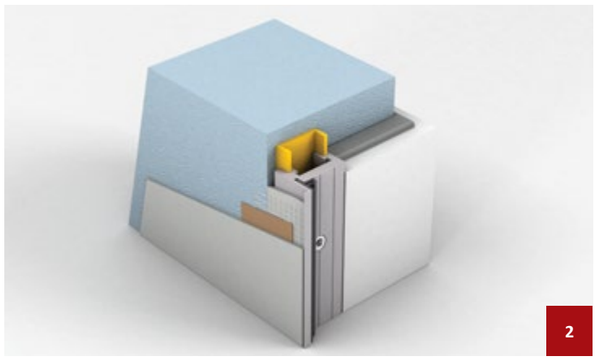

1 | MONTAŽA NA CIGLENI ZID
Konstrukcija dovratnika omogućuje montažu na više načina (uz pomoć vijaka, spojnih okova i sporoekspandirajuće pjene). Opcionalno je moguće koristiti poseban potprofil „U" oblika koji omogućuje fino niveliranje nagiba štoka.

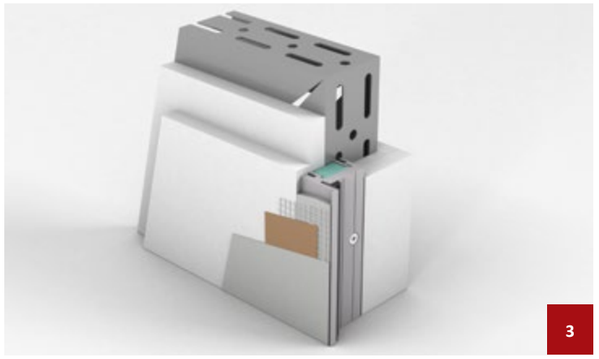

2 | MONTAŽA NA ZID OD SIPOREXA
Moguća je i primjena na porobetonu.

3 | MONTAŽA NA KNAUF ZIDU
Upotrebom bandažne mrežice s glet masom te u završnom sloju papirnate bandažne trake dobivamo čvrst i postojan završetak zida bez vidljivog spoja.

4 | MONTAŽA NA MDF I FURNIRANE PLOČE
Male dimenzije samog dovratnika čine ga pogodnim i za tanje pregrade (primjerice na mobilnim stambenim objektima).
